

**H. Jay Enck, CxAP, HBDP, LEED AP, CPMF  
Founder/Principal/Senior Commissioning Agent  
Commissioning & Green Building Solutions, Inc.  
Buford, Georgia**

H. Jay Enck is the founder and principal of Commissioning and Green Building Solutions, Inc. (CxGBS). An innovative leader in building commissioning, operational efficiency, building forensics, green design and sustainable development, he has conducted commissioning processes for more than \$3billion in construction, including the ASHRAE Headquarters renovation.

Jay has more than 25 years experience in engineering, construction, and building operations. His forte is providing lessons learned to reduce owner risk and team effort, as well as providing a Holistic Commissioning™ that starts in pre-design and carries through for life of the building.

Mr. Enck is a founding board member of the Atlanta Regional Chapter of U.S. Green Building Council (later the Georgia USGBC), and serves the USGBC nationally on the Energy & Atmosphere technical advisory group, as well as the LEED™ Accreditation Exam Development Committee. As a member of ASHRAE, he is a contributing author of the ASHRAE Green Guide, Advanced Energy Design Guides for Small Offices, Retail, and Warehouses, serves on TC 2.8 Building Environmental Impacts and Sustainability, TC 7.6 Systems Energy Utilization, TC 9.9 Building Commissioning, High Performance Building Design Professional and Building Commissioning Certification committees.

CxGBS is a member of the Building Commissioning Association (BCA), and Jay is a founding member of the Southeast Regional Chapter. He is also an instructor for commissioning processes courses through the University of Wisconsin in Madison and committee members of the National Institute of Building Sciences (NIBS) committee developing building envelop commissioning standards.

Mr. Enck assists with integration of the sustainable development principals and the LEED rating system toward certification and was the sustainability consultant/Commissioning Authority for several "firsts": The 1st LEED Silver Certified building in the southeast and the 1st LEED Silver Certified lab in the U.S. (Joseph B. Whitehead building at Emory University); the 1st LEED Gold Certified office in the southeast and the 1st LEED Gold Certified project in Georgia (Arthur M. Blank Family Office); and the 1st LEED Certified project in Alabama and 1st LEED Silver Certified middle school in the U.S. (Homewood Middle School).
